EDUCATION

Master of Computer Applications (MCA) Jawaharlal Nehru Technological University (JNTUH), Hyderabad	Sep 2024 – Jul 2026 SGPA: 9.0 / 10
Bachelor of Computer Applications (BCA) Bhavan's Vivekananda College, Hyderabad	Aug 2021 – Jun 2024 CGPA: 9.42 / 10

TECHNICAL SKILLS

Backend	Node.js, Express.js, Python, FastAPI, REST APIs, JWT / OAuth 2.0, WebSockets, BullMQ
Cloud & DevOps	AWS (EC2, S3, RDS, IAM, CloudWatch), Docker, GitHub Actions CI/CD, Nginx, Linux
AI / ML	LangChain, RAG Pipelines, Gemini API, OpenAI API, Chroma Vector DB
Databases	PostgreSQL, MongoDB, Redis, Prisma ORM, Query Optimisation
CS Fundamentals	Data Structures & Algorithms, System Design (HLD / LLD), OOP, DBMS, OS
Languages	TypeScript, JavaScript (ES6+), Python, Java, SQL, Solidity
Other	React.js, Next.js, React Native, Tailwind CSS, Hardhat, Swagger / OpenAPI

EXPERIENCE

Software Development Engineer Intern Pravachan	Mar 2025 – Nov 2025 Remote, India
- Built a cross-platform mobile app (React Native + Node.js backend) serving 2,000+ active users with a centralised admin dashboard, maintaining 99%+ uptime across Android and iOS. - Reduced API response time by ~35% by implementing Redis caching and connection pooling on high-traffic endpoints. - Designed a Docker microservices architecture (auth, media, payments, notifications, analytics) with PostgreSQL, MongoDB, and Redis; automated deployments via GitHub Actions CI/CD, cutting release time by over 80%. - Built Razorpay subscription APIs covering the full payment lifecycle — create, renew, cancel, and webhook failure recovery; integrated Cloudflare CDN for global content delivery.	
Head, Fusion Tech Club Bhavan's Vivekananda College	Mar 2022 – Apr 2024 Hyderabad
Led a community of 400+ students — organised 10+ workshops on system design, Android development, and project bootcamps; mentored teams from design to deployment.	

PROJECTS

AutoETH — Autonomous Agent & Smart Contract System [ETHGlobal] [GitHub] [Live] Python · FastAPI · Solidity · Hardhat · Next.js · TypeScript · WebSockets · Web3.py	ETHGlobal: ETHOnline 2025
- Engineered a Python/FastAPI backend orchestrating multiple autonomous agents — each agent runs independently, polls the blockchain every 5 seconds, and submits transactions with nonce management and retry logic. - Wrote and deployed Solidity smart contracts using Hardhat; integrated Pyth Network's price oracle (2-step update flow, 8-decimal precision) for on-chain data verification and round finalisation. - Built a Next.js + TypeScript real-time dashboard with WebSocket streams showing live agent activity, round state, and historical performance; implemented dynamic gas optimisation and concurrent transaction handling via Web3.py.	
Cymatic — Multi-Agent Backend Platform [ETHGlobal] [GitHub] Python · FastAPI · Solidity · Foundry · REST APIs · Multi-Agent Architecture	ETHGlobal: Open Agents, 2025
- Python/FastAPI backend with cleanly separated agent layers (voice processing, identity, orchestration, execution); designed for graceful degradation across unstable upstream dependencies. - Wrote smart contracts in Solidity, tested with Foundry; implemented caller-linked identity layer mapping phone numbers to on-chain state.	
AI Buddy — Personalised Learning Platform [GitHub] React.js · Node.js · MongoDB · Gemini API · LangChain · Tailwind CSS	2024
Study platform used by 100+ students — PDF uploads processed through an NLP pipeline to generate personalised explanations, quizzes, and flashcards; adaptive quiz engine adjusts difficulty from performance history.	

ACHIEVEMENTS & PUBLICATIONS

- Runner-up** — National Level Technical Fest “Informatique Exhib”; recognised at Charles Babbage Day Competition and Technoment Award.
- Publication:** “Futuristic Trends in IoT” — co-authored peer-reviewed paper on emerging IoT technologies.
