EDUCATION

Master of Computer Applications (MCA)

Jawaharlal Nehru Technological University (JNTUH), Hyderabad

Sep 2024 – Jul 2026

SGPA: **9.0 / 10**

Bachelor of Computer Applications (BCA)

Bhavan's Vivekananda College, Hyderabad

Aug 2021 – Jun 2024

CGPA: **9.42 / 10**

TECHNICAL SKILLS

Languages	Java, TypeScript, JavaScript (ES6+), Python, SQL
Web & Backend	Node.js, Express.js, FastAPI, REST APIs, JWT / OAuth 2.0, WebSockets
Frontend	React.js, Next.js, React Native, Tailwind CSS, HTML5, CSS3
Cloud & DevOps	AWS (EC2, S3, RDS), Docker, GitHub Actions CI/CD, Git, Nginx, Linux
Databases	PostgreSQL, MongoDB, Redis, Prisma ORM, Query Optimisation
CS Fundamentals	Data Structures & Algorithms, System Design (HLD / LLD), OOP, DBMS, OS
Other	Gemini API, LangChain, Swagger / OpenAPI, Postman, Agile / Git Workflow

EXPERIENCE

Software Development Engineer Intern

Mar 2025 – Nov 2025

[Pravachan](#)

Remote, India

- Developed and maintained a **full-stack mobile platform** (React Native frontend + Node.js/Express backend) serving **2,000+ active users** with a centralised admin dashboard.
- Designed RESTful APIs with JWT authentication, role-based access control, and Zod input validation; implemented Redis caching that reduced response time by **~35%**.
- Built a **Docker-based microservices architecture** (auth, media, payments, notifications, analytics); set up **GitHub Actions CI/CD** pipeline that cut release time by over 80%.
- Integrated Razorpay payment gateway handling the full subscription lifecycle — create, renew, cancel, and webhook failure recovery; integrated Cloudflare CDN for global content delivery.

Head, Fusion Tech Club

Mar 2022 – Apr 2024

[Bhavan's Vivekananda College](#)

Hyderabad

- Led **400+ students** — organised 10+ workshops on Java, OOP, system design, and Android development; mentored teams from design to deployment.

PROJECTS

AutoETH — Full-Stack Automation & Smart Contract Platform [\[ETHGlobal\]](#) [\[GitHub\]](#) [\[Live\]](#)

2025

Next.js · TypeScript · Python · FastAPI · Solidity · Hardhat · WebSockets · Web3.py

- Built a **Next.js + TypeScript** frontend with a real-time WebSocket dashboard showing live agent activity and performance history; **Python/FastAPI** REST backend handling agent orchestration, scheduling, and concurrent transactions.
- Wrote and deployed **Solidity smart contracts** with Hardhat; integrated an external price oracle (Pyth Network) for on-chain data verification, round management, and automated settlement logic.
- Implemented dynamic gas optimisation, nonce management, and retry logic in Python — designed for reliable operation under network congestion.

AI Buddy — Student Learning Platform [\[GitHub\]](#)

2024

React.js · Node.js · MongoDB · Gemini API · LangChain · Tailwind CSS

- Full-stack web app used by **100+ students** — PDF/note uploads processed through an NLP pipeline to auto-generate personalised explanations, quizzes, and flashcards via Gemini API.
- Adaptive quiz engine tracks user performance history and adjusts question difficulty dynamically; designed responsive UI with React.js and Tailwind CSS.

Cymatic — Distributed Multi-Agent System [\[ETHGlobal\]](#) [\[GitHub\]](#)

2025

Python · FastAPI · Solidity · Foundry · REST APIs

- Built at **ETHGlobal hackathon** — Python/FastAPI backend with modular, independently deployable agent layers (input processing, identity, orchestration, execution); smart contracts in Solidity tested with Foundry.

ACHIEVEMENTS & PUBLICATIONS

- Runner-up** — National Level Technical Fest “Informatique Exhib”; recognised at Charles Babbage Day Competition and Technoment Award.
- Publication:** “Futuristic Trends in IoT” — co-authored peer-reviewed paper on emerging IoT technologies.
